EXPERIMENT-03

Aim: How to Recover Deleted Files using Forensics Tools

Reference screenshots taken from the lab manual (CR23532); the tools could not be run on this computer.

Figure 1: Reference screenshot from the lab manual: the test file created in Notepad.

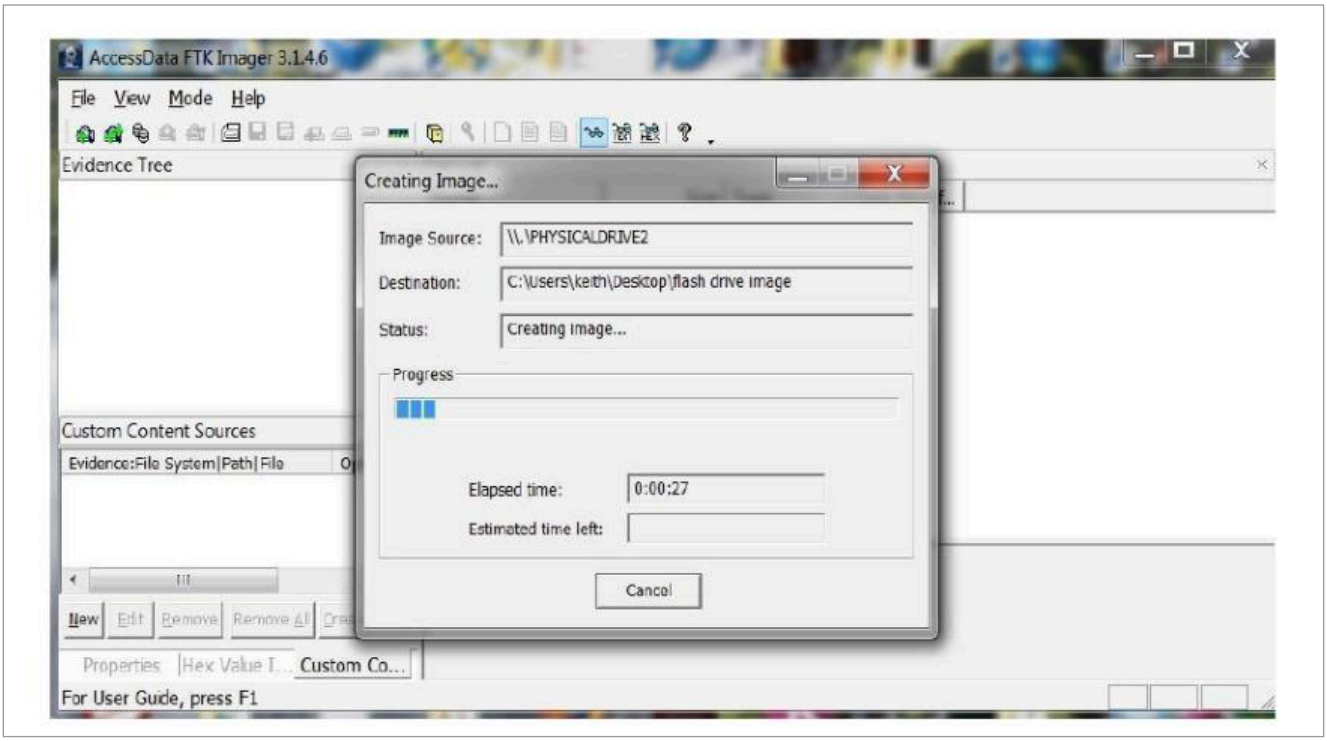

Figure 2: Reference screenshot from the lab manual: FTK Imager creating a bit-by-bit image of the flash drive.

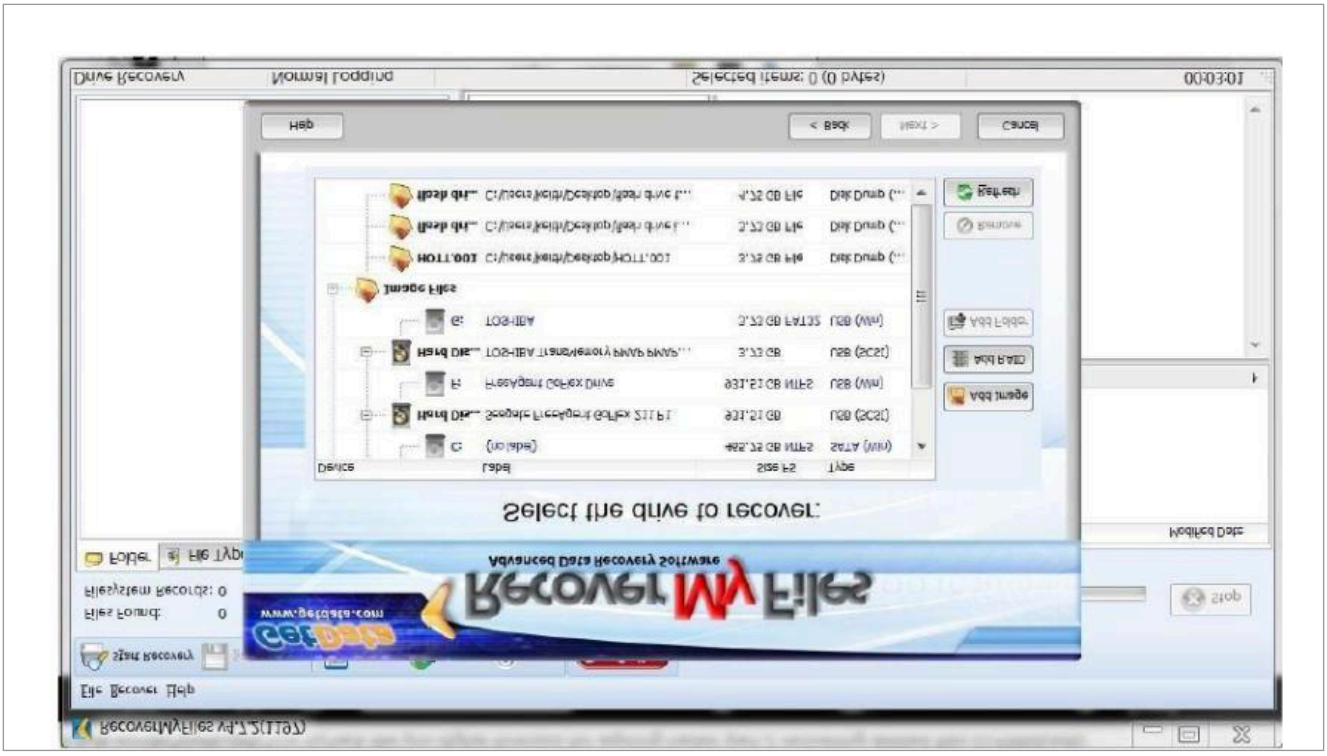

Figure 3: Reference screenshot from the lab manual: RecoverMyFiles, selecting the drive image to recover.

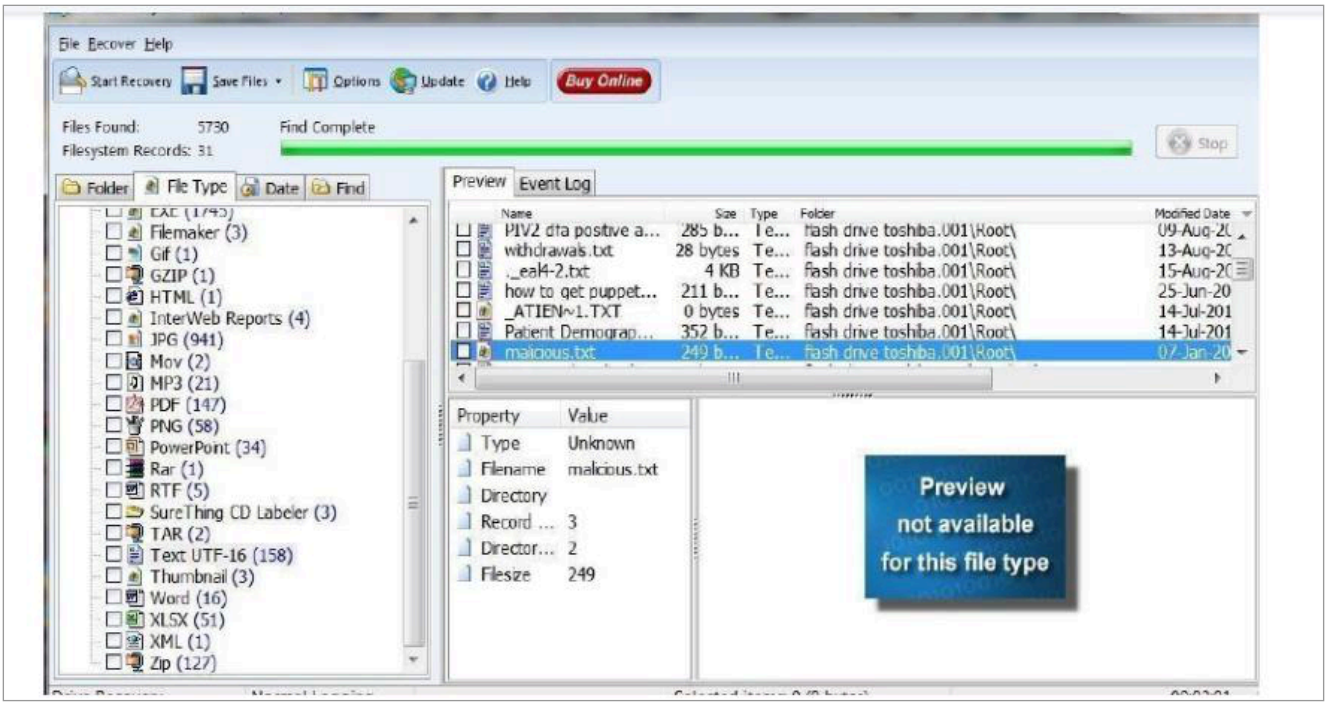

Figure 4: Reference screenshot from the lab manual: recovered files listed by type; the deleted malicious.txt is recovered.
