EXPERIMENT-09

Aim: Hiding and extracting a text file behind an image file / audio file using Command Prompt

Screenshots taken on this computer (Windows 11) on 28-10-2026 (LAPTOP-8DDGHPR6).

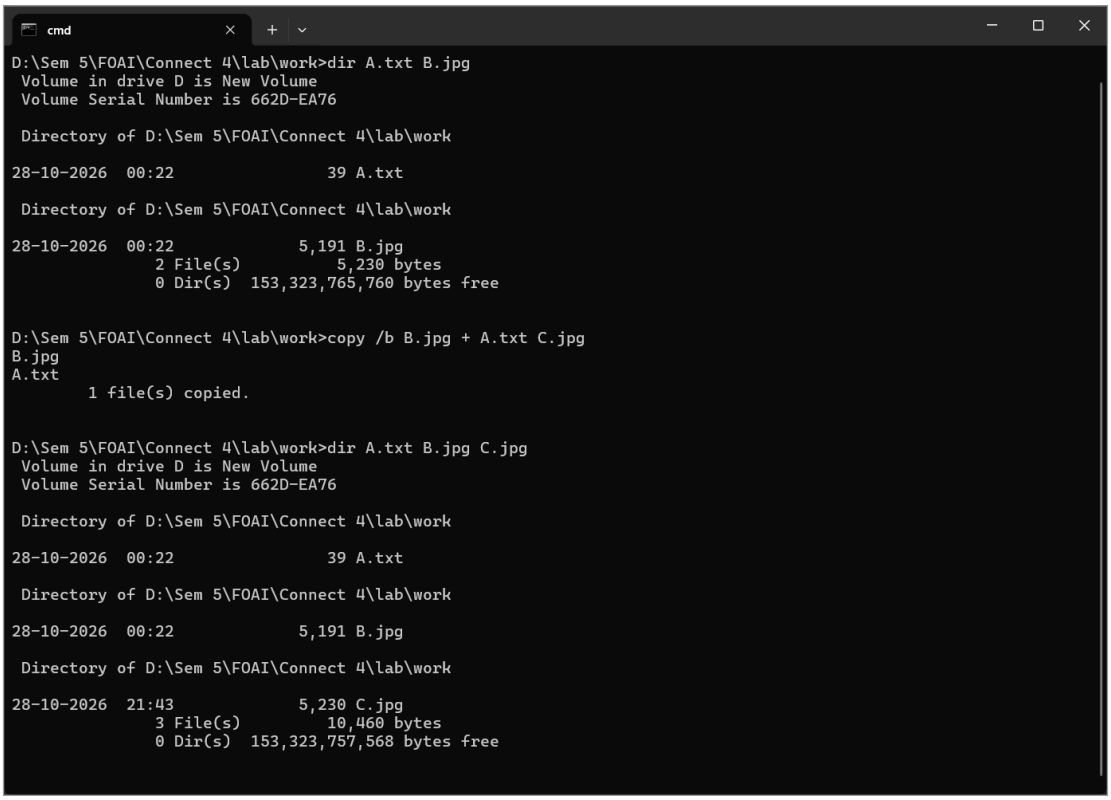

Figure 1: Hiding the text file A.txt behind the image B.jpg with copy /b; C.jpg is larger than B.jpg by the size of A.txt.

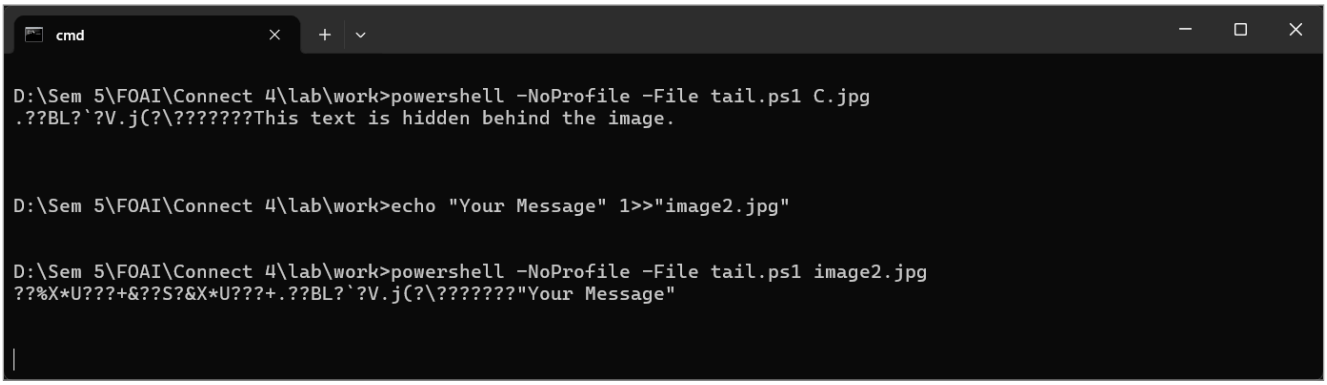

Figure 2: The hidden text is visible at the end of C.jpg; the echo method appends a message to image2.jpg in the same way.

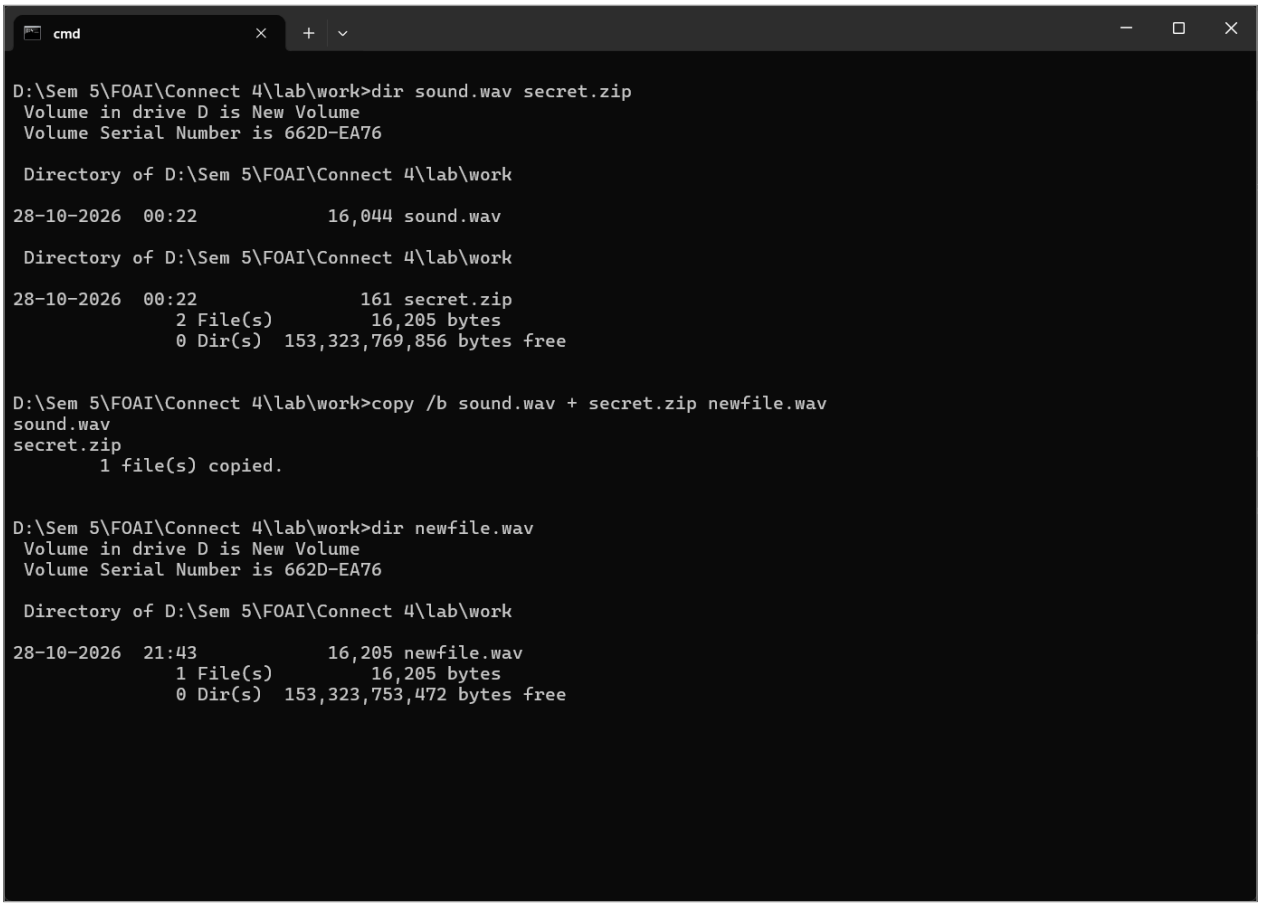

Figure 3: Merging secret.zip into the audio file sound.wav with copy /b to make newfile.wav.

Figure 4: Renaming the audio file to .zip and opening it shows the hidden file secret.txt and its content.
